

Eleventh International Conference Engineering Computational Technology 2020

Fourteenth International Conference Computational Structures Technology 2020

8–10 September 2020
Palma, Mallorca, Spain

Call for Papers

Joint opening lecture: **Professor Klaus-Jürgen Bathe**, *Massachusetts Institute of Technology, USA*

- Computational methods
- Computational techniques
- Computational engineering: Education and training
- Engineering modelling, simulation including pre- and post-processing
- Engineering design, optimisation and manufacture
- Engineering modelling, information systems, management and decision making
- Engineering applications of computational technology
- Software development and maintenance for engineering applications

Chairs:

Professor B.H.V. Topping, Hungary and UK **Professor P. Ivanyi**, Hungary

www.ectconference.com #ECT2020

- Computational methods
- Structural types and studies
- Analysis: Methods and techniques
- Materials modelling and characterisation
- Computational engineering: Education and training
- Pre and post processing
- Optimisation and design
- Software development: Tools, techniques and issues
- Areas of application including all aspects of aerospace, civil, mechanical, geotechnical, railway and offshore structures

Chairs:

Professor B.H.V. Topping, Hungary and UK **Professor J. Kruis**, Czech Republic

www.cstconference.com #CST2020

Organised by

Abstracts are invited by 13 December 2019 for oral and poster presentations for both conferences

Participants should submit abstracts to their preferred choice of conference but may attend sessions from either conference.
